

Relief with Every Blink

Blinking is the eye's natural way of replenishing the tear film.

Over the course of the day, a film of protein and other material can build-up on your contact lenses, irritating your eyes and clouding your vision. **Blink-N-Clean® Lens Drops** does more than just moisturize your soft and rigid gas permeable (RGP) contact lenses. Its dual cleansing formula gently removes build-up and moisturizes your contact lenses while you wear them.

Keeps lenses feeling **fresh**
& **your vision clear**

Instantly moisturizes
dry lenses

Provides convenient &
gentle in-eye cleaning
